Cardiac Rehabilitation
Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs

In 1991, Guidelines for Cardiac Rehabilitation Programs became the first definitive set of guidelines for practicing cardiac rehabilitation. Now, this second edition substantially updates and expands upon the first edition and parallels the new federal guidelines for implementing and restructuring cardiac rehabilitation programs. These state-of-the-art practice guidelines were developed by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR) - the international leader in the scientific study and clinical application of cardiac rehabilitation. The new Guidelines now contains complete sections on The Elderly Participant, Resistance Training in Cardiac Rehabilitation, Psychosocial Assessment and Intervention, and Outcomes. Also, the second edition helps prepare readers for the future of cardiac rehab, including suggestions for limiting costs, increasing accessibility to low-risk patients, and using risk stratification techniques.

Cardiac Rehabilitation, An Issue of Clinics in Geriatric Medicine

This issue of Clinics in Geriatric Medicine, guest edited by Dr. Daniel E. Forman, is devoted to Cardiac Rehabilitation. Articles in this outstanding issue include: Cardiac Rehabilitation: No Such Thing As ‘Too Old’; Evaluating and Treating Frailty in Cardiac Rehabilitation; Utility of Home-based Cardiac Rehabilitation for Older Adults; Benefits of Smart devices, Wearables, and Other Telehealth Options to Enhance Cardiac Rehab; Resistance Training in Cardiac Rehabilitation for Older Adults; High Intensity Interval Training (HIIT) in Cardiac Rehabilitation for Older Adults; Pre-habilitation: The right medicine for older frail adults anticipating TAVR, CABG, and other cardiovascular care; Using Cardiac Rehabilitation to Adjust Medications in Older Adults: Aggressive Prevention and Deprescribing as 2 Sides of the Same Coin; Gender Disparities in Cardiac Rehabilitation Among Older Women: Key opportunities to improve care; Cardiac Rehabilitation for TAVR; Cardiac Rehabilitation for Heart Failure in Older Adults; Cardiac Rehabilitation for Peripheral Arterial Disease (PAD) in Older Adults; Cardiac Rehabilitation as Part of Management in Post-acute Care (PAC): Opportunities for improving care; and Tailoring Assessments in Cardiac Rehabilitation for Older Adults: The relevance of geriatric domains.

ESC Handbook of Cardiovascular Rehabilitation

Cardiac Rehabilitation

Guidelines for Cardiac Rehabilitation Centers

Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs, Fifth Edition With Web Resource, covers the entire scope of practice for cardiac rehabilitation and secondary prevention (CR/SP) programs. This text was developed by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR) and parallels federal guidelines for cardiac rehabilitation programs. It contains information on promoting positive lifestyle behavior patterns, reducing risk factors for disease progression, and lessening the impact of cardiovascular disease on quality of life, morbidity, and mortality. The text has been updated and restructured, providing the most current models for designing and updating rehabilitation programs for patients and preventing second episodes. In addition to chapter revisions, there is new content on behavior modification, risk factors, and special populations. The chapter covering program administration has been completely rewritten to include new regulations and reimbursement standards as well as additional suggestions for new models for CR/SP. The most recent Core Competencies for Cardiac Rehabilitation and Secondary Prevention Professionals and the Core Components of Cardiac Rehabilitation/Secondary Prevention Programs have also been included in their entirety. More than 50 leaders in the field of CR/SP, cardiovascular risk reduction, reimbursement, and public policy have contributed the latest tools and information, enabling cardiac rehabilitation professionals to successfully start new programs or update and enhance existing ones. Key features of the fifth edition include the following: • A new web resource incorporates 24 questionnaires, charts, consent forms, protocols, records, checklists, and logs from the text that can be used when creating or assessing programs. • Highlighted guidelines in each chapter cover current issues and provide hints and methods for implementing treatment programs and helping patients stay on track. • Chapter objectives and summaries help readers quickly assess the topics covered and identify the most important points. There is strong evidence that participation in outpatient cardiac rehabilitation and secondary prevention programs decreases mortality and

Get Free Guidelines For Cardiac Rehabilitation And Secondary Prevention Programs, Fifth Edition, offers procedures for providing patients with low-cost, high-quality programming, moving them toward personal responsibility for disease management and secondary prevention over a lifetime. This is the definitive resource for developing inpatient and outpatient cardiac rehabilitation programs.

Best Practice Guidelines for Cardiac Rehabilitation and Secondary Prevention

Cardiac rehabilitation is of key importance to ameliorate long-term morbidity and mortality resulting from cardiac intervention. However, much of the current literature is dense, unwelcoming and academic in style and format. For those physicians understanding the scope of cardiac rehabilitation there is a need to distill the guidelines and various management options available to them into a concise practical manual. Up until now, all references have looked at the general options, but there is definite need to investigate the practicalities of individual patient groups. This book fulfills the need for practical guidance among all professionals involved in the management of these patients, from residents and fellows of cardiology and internal medicine, surgical teams, physiotherapy professionals, critical care physicians and family medicine practitioners.

Cardiac Rehabilitation Manual

This detailed reference provides practical strategies and a scientific foundation for designing and implementing cardiac rehabilitation services to relieve the symptoms of cardiovascular disease patients through exercise training and risk reduction and secondary prevention, improve quality of life, and decrease mortality. Emphasizes multidisciplinary care that includes exercise training, behavioral interventions, and education and counseling regarding lifestyle changes and other aspects of secondary prevention! Written by world-renowned physicians, nurses, exercise physiologists, psychologists, dietitians, educators, and counselors in the field, Cardiac Rehabilitation presents evidence-based medicine as the cornerstone of clinical cardiology practice discusses interventions that limit the physiological and psychological effects of cardiac illness offers guidelines that enable elderly patients to maintain self-sufficiency and functional independence describes means of social and workplace reintegration evaluates policies for maintaining high-quality care, efficacy, and safety in an atmosphere of diminishing resources explains the role of managed care in moving rehabilitative care into the home, workplace, and other nontraditional sites assesses new interactive technologies that aid in tracking patient data gives pragmatic recommendations for the delivery of cardiac rehabilitative care in the next millennium and more! Advocating integrated, high-quality, consistent cardiac rehabilitation services for the well-being of patients recovering from a variety of cardiovascular problems and
procedures, Cardiac Rehabilitation is ideally suited for cardiologists, cardiovascular surgeons, primary care physicians, cardiac rehabilitation professionals, cardiac care nurses, dietitians, physical and occupational therapists, exercise physiologists, psychologists, behavioral counselors, hospital managers, health plan designers, and upper-level undergraduate, graduate, and medical school students in these disciplines.

**Best Practice Guidelines for Cardiac Rehabilitation and Secondary Prevention**

This book is a timely and thorough review of prevention, lifestyle counseling and rehabilitation for cardiologists and all physicians and other health professionals in cardiac rehabilitation teams. The Editors have gathered over 60 experts from all parts of the globe. Each highlights the role of cardiac rehabilitation and preventative cardiology from exercise testing and training, through nutrition, smoking cessation, behavioral and social support to adapted programs for newer groups with specific demands. The book emphasizes the organizational aspects of cardiac rehabilitation, including quality assurance and economic evaluation.

"The goal of the CACR is to provide leadership in clinical practice, research and advocacy in cardiac disease prevention and rehabilitation for the enhancement and maintenance of cardiovascular health of Canadians."-- p. i of book.

**Best Practice Guidelines**

**Cardiac Rehabilitation**

This volume offers state-of-the-art information and serves as a manual to providers about the multidisciplinary nature of cardiac rehabilitation in the current era, the current state of cardiac rehabilitation, and the issues presenting to current CR programs.
Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs

Cardiac Rehabilitation

This edition addresses the cost effectiveness of interventions that educate and motivate patients to assume personal responsibility for long-term disease prevention.

Cardiovascular Prevention and Rehabilitation in Practice

The last three years have seen tremendous advances in the growth of cardiac rehabilitation programs within the UK and throughout Europe. The formation of the British Association for Cardiac Rehabilitation (BACR) has been a milestone in the development of a professional network that aims to improve the safety and standards of programs throughout the UI. Edited and written by a multidisciplinary subcommittee of the BACR, this book will be an invaluable tool for practitioners working in cardiac rehabilitation. BACR Guidelines for Cardiac Rehabilitation provides an overview of research findings. Areas covered include the structure, content, personnel, administration and funding of a program, as well as detailed information on exercise testing and prescription, motivating adults to exercise and other psycho-social aspects of cardiac rehabilitation.

Cardiac Rehabilitation

This detailed reference provides practical strategies and a scientific foundation for designing and implementing cardiac rehabilitation services to relieve the symptoms of cardiovascular disease patients through exercise training and risk reduction and secondary prevention, improve quality of life, and decrease mortality. Emphasizes multidisciplinary aspects.

AACVPR Cardiac Rehabilitation Resource Manual is the companion text to Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs. It complements and expands on the guidelines book by providing additional background material on key topics, and it presents new material concerning cardiac rehabilitation and secondary prevention. AACVPR Cardiac Rehabilitation Resource Manual combines reference-based data with practical information from the field. It applies current position statements, recommendations, and scientific knowledge from medical and scientific literature to aid in designing and developing safe, effective, and comprehensive cardiac rehabilitation programs. Useful for practitioners as well as students and instructors who are learning and teaching key concepts, AACVPR Cardiac Rehabilitation Resource Manual provides strong background support to topics addressed in the guidelines, such as risk factors for coronary heart disease, secondary prevention, psychosocial issues, and patients with special considerations. In addition, each chapter opens with a cross-reference box so that readers know where to reference the topic in the guidelines book. In addition to supporting information for the guidelines, the manual contains new information to help round out cardio programs. Topics include the atherosclerotic disease process, cardiovascular and exercise physiology, exercise prescription, and the electrocardiogram. AACVPR Cardiac Rehabilitation Resource Manual is divided into three parts. Part I examines the development and prevention of coronary artery disease, including reduction of risk factors, psychosocial issues and strategies, and contemporary procedures for revascularization. Part II delineates the role of exercise in heart disease, including the exercise and coronary artery disease connection, cardiovascular and exercise physiology, and exercise prescription. Part III focuses on special considerations, including heart disease as it relates to women and to the elderly and considerations for people with diabetes, chronic heart failure, and heart transplants. AACVPR Cardiac Rehabilitation Resource Manual contains pertinent, detailed information on the topics involved in contemporary cardiac rehabilitation and secondary prevention of coronary artery disease. Teamed with Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs, the book provides professionals and students with the full range of guidelines and background materials needed for teaching and understanding the key issues in cardiac rehabilitation and secondary prevention.

Canadian Guidelines for Cardiac Rehabilitation and Atherosclerotic Heart Disease Prevention

Guidelines for Cardiac Rehabilitation Programs, Sixth Edition With Web Resource, presents the combined expertise of more than 50 leaders in the field of cardiac rehabilitation (CR), reimbursement, and public policy to empower professionals to successfully implement new CR programs or improve existing ones. Developed by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR), this guidebook offers procedures for providing patients with low-cost, high-quality programming that moves them toward a lifelong commitment to disease management and secondary prevention. Cardiovascular disease (CVD) is the principal cause of death worldwide. It is projected that by 2035, more than 130 million adults in the United States will have CVD. The challenge to CR
professionals is to select, develop, and deliver appropriate rehabilitative and secondary prevention services to each patient tailored to their individual needs. Guidelines for Cardiac Rehabilitation Programs, Sixth Edition, is the definitive resource for developing inpatient and outpatient cardiac rehabilitation programs. The sixth edition of Guidelines for Cardiac Rehabilitation Programs equips professionals with current scientific and evidence-based models for designing and updating rehabilitation programs. Pedagogical aides such as chapter objectives, bottom line sections, summaries, and sidebars present technical information in an easy-to-follow format. Key features of the sixth edition include the following: A new chapter on physical activity and exercise that helps readers understand how to develop and implement exercise programs to CVD patients A new chapter on cardiac disease populations that offers readers a deeper understanding of CVD populations, including those with heart valve replacement or repair surgery, left ventricular assist devices, heart transplant, dysrhythmias, and/or peripheral artery disease Case studies and discussion questions that challenge readers to consider how concepts from the text apply to real-life scenarios An expanded web resource that includes ready-to-use forms, charts, checklists, and logs that are practical for daily use, as well as additional case studies and review questions Keeping up with change is a professional necessity and keeping up with the science is a professional responsibility. Guidelines for Cardiac Rehabilitation Programs, Sixth Edition, covers the entire scope of practice for CR programs and professionals, providing evidence-based information on promoting positive lifestyle behavior patterns, reducing risk factors for disease progression, and lessening the impact of CVD on quality of life, morbidity, and mortality. Note: The web resource is included with all new print books and some ebooks. For ebook formats that don't provide access, the web resource is available separately.

Guidelines for Quality Assurance in Cardiac Rehabilitation

The authoritative clinical handbook promoting excellence and best practice Cardiovascular Prevention and Rehabilitation in Practice is a comprehensive, practitioner-focused clinical handbook which provides internationally applicable evidence-based standards of good practice. Edited and written by a multidisciplinary team of experts from the British Association for Cardiovascular Prevention and Rehabilitation (BACPR), this book is invaluable for practitioners helping people with heart disease return to health. The text provides an overview of research findings, examines the core components of cardiac rehabilitation, and discusses how to support healthier lifestyles and reduce the risks of recurrence. Now in its second edition, this textbook has been fully revised to incorporate recent clinical evidence and align with current national and international guidelines. Increased emphasis is placed on an integrated approach to cardiac rehabilitation programmes, whilst six specified standards and six core components are presented to promote sustainable health outcomes. Describes how cardiovascular prevention and rehabilitation programmes can be delivered to meet standards of good practice Covers a broad range of topics including: promoting health behaviour change to improve lifestyle risk factors, supporting psycho-social health, managing medical risk factors, and how to develop long-term health strategies Emphasises the importance of early programme commencement with assessment and reassessment of patient goals and outcomes, and gives examples of strategies to achieve these Discusses the role of programme audit and certification of meeting minimum standards of practice Looks to the future and how delivery of cardiovascular prevention and rehabilitation programmes internationally will need to meet common challenges Cardiovascular Prevention and Rehabilitation in Practice is an indispensable resource for all health professionals involved in cardiac rehabilitation and cardiovascular disease prevention.
